→ WHAT ?

EDUCATIONAL WORKSHOPS ON POLLUTION

With indoor school activities involving teachers or outdoor excursions such as forest trips with parents, we aim to raise children's awareness about pollution in a fun and engaging way

→ HOW ?

A TWO-STEP PLAN

First of all, we want to work with the teachers and help them so they can better address the topic, and then we want to encourage the children to come see us with their parents to discover the potential consequences of pollution on the world around us, and help them appreciate the nature that needs to be protected.

→ WHY ?

RAISING AWARENESS OF ENVIRONMENTAL ISSUES

We want to help teachers tackle the topic: we believe awareness about our environment is not raised enough or effectively enough. yet, it is a very important issue that needs to be discussed.

→ AND THEN ?

NOT JUST CHILDREN

This topic is not only relevant to children. However, through them, parents and society as a whole will be touched by the issue: in this way, we will motivate the community to learn more about the environment and adopt good habits.
